

Sincronitza®

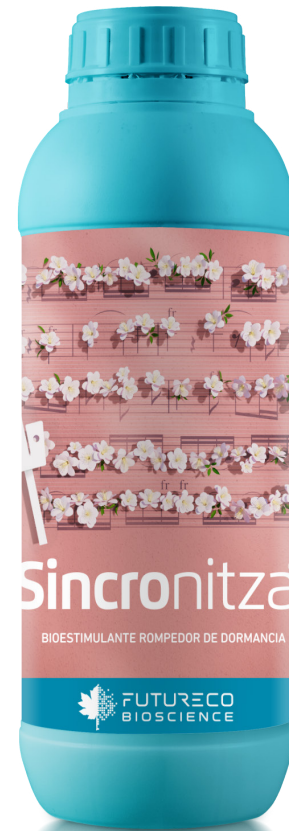

Bud break uniformity biostimulant

FEATURES AND BENEFITS

Sincronitza® is a biostimulant specially formulated to standardize bud break in deciduous fruit trees and synchronize phenological stages. Its action homogenizes flowering and fruit growth, allowing to shorten harvest curves and generating greater efficiency in the different productive management throughout the cycle.

Sincronitza® contains specific amino acids carefully selected to stimulate hormonal balance, which is essential for breaking the winter dormancy. It promotes the biosynthesis of growth promoters, reduces the concentration of inhibitors, and simultaneously boosts vegetative development, ensuring a solid and uniform restart of the cycle.

The macronutrients present enhance the synthesis of key enzymes and proteins for the reactivation of metabolic processes and the utilization of stored reserves, contributing to the optimal development of reproductive organs, improving fruit set, and the formation of high-quality fruit.

WARRANTIES

(%P/P)

Free L-Amino Acids*	2,2
Total Nitrogen (N)	16
Calcium (Ca)	2,5

***Standard Aminogram:** Methionine (1% w/w); Glutamic acid (1% w/w). Obtained through bacterial fermentation of *Brevibacterium sp* and *Corynebacterium flavescens* and enzymatic hydrolysis of plant proteins.

FORMULATION

Liquid solution.

Pink color.

Free of heavy metals.

Fast absorption and easy handling.

RECOMMENDED DOSAGE AND APPLICATION TIMING

CROP	DOSE (l/ha)	APPLICATION
Nuts	4	30-40 days before estimated flowering date. 1 single application per season.
Drupes	5 – 6	
Pome fruits	3	

If in doubt, contact your local distributor for technical advice.

- ✓ **Sincronitza**® should be applied via foliar spray 35 (±5) days before the start of bud break.
- ✓ It is recommended not to apply on crops younger than 4 years.
- ✓ Try to apply within the indicated time range.
- ✓ Do not apply during vegetative growth.

APPLICATION METHODS

Sincronitza® is applied via foliar application, following label directions.

FIELD RESULTS

There are no trials available yet.

COMPATIBILITY

It is recommended to do a compatibility test in a small volume before applying any mixture with this product.

STABILITY AND STORAGE

Sincronitza® is stable for at least 3 years from the date of manufacture.

Store in a cool, ventilated place at temperatures below 50°C.

Do not store for prolonged periods in places with direct sun exposure.

Keep out of reach of children.

Do not eat, drink, or smoke while using.

Last update: April 2025. Revision nº 1.
