

# Itcan NEVENTA

## Nitrogen-based biostimulant solution with microelements

### FEATURES AND BENEFITS

**ITCAN NEVENTA** is a fertilizer enriched with a high concentration of **nitrogen** and essential micronutrients, specially designed to enhance overall plant nutrition and boost metabolic activity.

Nitrogen is an essential macronutrient for the physiological development of crops, playing a central role in the biosynthesis of amino acids, proteins, chlorophyll, and key primary metabolites. Its availability is critical during the early stages of vegetative growth, as it directly influences leaf expansion and stem elongation, processes that are fundamental for maximizing photosynthetic capacity and, consequently, the productive efficiency of the plant. Additionally, **ITCAN NEVENTA** is formulated with co-adjuvants and complementary nutrients that ensure **fast and efficient absorption** through both foliage and roots, especially when applied via fertigation.

### FORMULATION

Liquid solution  
 Burgundy color  
 Density (20°C) g/cc: 1,09  
 pH: 7,11  
 Quick adsorption and easy handling.

### COMPOSITION

(%W/W) (%W/V)

Organic Carbon	8,0	9,5
Total Nitrogen (N)	11,0	13,0
Boron (B)	0,1	0,16
Copper (Cu)	0,04	0,04
Iron (Fe)	1,0	1,19
Manganese (Mn)	0,5	0,56
Molybdenum (Mo)	0,05	0,05
Zinc (Zn)	0,1	0,12
L-Free Amino acids	4,0	4,2

\*100% chelated by EDTA

## RECOMMENDED DOSAGE AND APPLICATION TIMING

CROP	DOSAGE (kg/ha)	APPLICATION
Fruit trees	0,2 – 0,4%	Begin application at the start of the crop cycle and repeat every 10 to 15 days.
Horticultural		For drip irrigation, apply 12 to 15 L/ha per application, with 2 to 3 applications after planting or during the early stages of crop development.

**ITCAN NEVENTA** is ideal for the early stages of crop development, such as sowing or transplanting. It is especially beneficial for flowering and horticultural plants, as well as for fruit tree transplants.

Its application promotes root growth and development, helping plants establish successfully during the critical first weeks, thereby ensuring healthy, vigorous, and long-lasting growth.

## APPLICATION METHODS

**ITCAN NEVENTA** can be applied both via foliar spray and through fertigation.

## COMPATIBILITY

It is compatible with most phytosanitary treatment products. It is recommended to perform a compatibility test in a small volume before applying any mixture with this product.

## STABILITY AND STORAGE

**ITCAN NEVENTA** is stable for at least 3 years from the date of manufacture. Store in a cool, well-ventilated place at temperatures below 50°C. Do not store for prolonged periods in areas with direct sunlight exposure. Keep out of reach of children. Do not eat, drink, or smoke while using this product.
